## SECTION 4: First-aid measures

**Description of necessary measures, subdivided according to the different routes of exposure, i.e., inhalation, skin and eye contact, and ingestion:**

**Inhalation:** Move affected person to fresh air and keep warm and at rest in a position

comfortable for breathing. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Oxygen should only be administered by qualified personnel. Seek medical advice.

**Skin contact:** Remove contaminated clothing. Wash with water and soap and rinse thoroughly. Seek medical advice if irritation or pain develops.

**Eye contact:** In case of eye contact, remove contact lenses and rinse immediately with plenty of water, including under the eyelids, for at least 15 mins. Get medical attention if symptoms develop.

**Ingestion:** Do NOT induce vomiting. Get medical attention immediately. If spontaneous vomiting occurs, keep head below hips to avoid breathing the product into the lungs. Never give anything by mouth to an unconscious person.

### **Most important symptoms/effects, acute and delayed:**

**Kit:** Harmful if swallowed, in contact with skin or if inhaled. Causes severe skin burns and eye damage.

**Plug 1:** None known

**Plug 2:** Causes severe eye irritation.

**Plug 3:** Causes severe eye irritation.

**Plug 4:** Harmful if swallowed, in contact with skin or if inhaled. Causes severe skin burns and eye damage.

**Wash 1:** Causes severe skin burns and eye damage.

**Wash 2:** None known

**Elution:** None known

**PCR Tube:** None known

### **Indication of immediate medical attention and special treatment needed:**

If any symptoms are observed, contact a physician and give them this SDS sheet. Provide general supportive measures and treat symptomatically.

## **SECTION 5: Fire-fighting measures**

### **Suitable (and unsuitable) extinguishing media:**

In case of fire: Use water spray (fog), carbon dioxide (CO<sub>2</sub>), dry chemical powder or foam to extinguish.

**Unsuitable extinguishing media:** Do not use water jet as an extinguisher, as this will spread the fire.

### **Specific hazards arising from the chemical (e.g., nature of any hazardous combustion products):**

Highly flammable. Easily ignited by heat, sparks or flames or other sources of ignition. Containers should be grounded and bonded. Vapors are initially heavier than air and spread along ground. Vapors may reach an ignition source, and flashback. Runoff to sewer may create fire or explosion hazard downstream from the source. Gases may form explosive mixtures with air.

## ARIES® Assay Kit

Hazardous combustion products may include the following substances: Carbon dioxide, carbon monoxide, nitrogen oxides, sulfur oxides.

### **Special protective equipment and precautions for fire-fighters:**

Move containers from fire area if you can do it without risk. Cool containers with flooding quantities of water until well after fire is out. Isolate the hazard area and deny entry to unnecessary and unprotected personnel. Keep out of drains, sewers, ditches and waterways. Inhalation is a health risk. Firefighters should wear self-contained breathing apparatus and full firefighting turnout gear. Wear self-contained breathing apparatus and protective clothing. In addition, wear other appropriate protective equipment as conditions warrant (see Section 8).

## **SECTION 6: Accidental release measures**

### **Personal precautions, protective equipment and emergency procedures:**

No action shall be taken involving any personal risk or without suitable training. For large spillages, evacuate the area of all non-essential personnel. Keep all sources of ignition and hot metal surfaces away from spill/release if safe to do so. The use of explosion-proof electrical equipment is recommended. Avoid contact with skin, eyes and clothing. Ventilate contaminated area thoroughly. Avoid contact with spilled or released material. Immediately remove all contaminated clothing. Stay upwind and away from spill/release. Wear appropriate protective equipment, such as gloves, goggles and protective clothing, as conditions warrant (see Section 8). See Sections 2 and 7 for additional information on hazards and precautionary measures. See Section 13 for disposal guidance.

### **Methods and materials for containment and cleaning up:**

Avoid disposal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage. Shut off leaks, if possible. Remove all possible sources of ignition in the surrounding area. Use appropriate containment (of product and firefighting water) to avoid environmental contamination. Absorb spill with inert material and place in suitable container for disposal.

## **SECTION 7: Handling and storage**

### **Precautions for safe handling:**

Keep away from heat, sparks and open flames. No smoking. Use only with adequate ventilation. Wear appropriate personal protective equipment and use exposure controls as indicated in Section 8. Avoid contact with skin and eyes. Avoid breathing product dust or vapors. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Non-sparking tools should be used. Ground and bond all transfer and storage equipment to prevent static sparks. Do not enter confined spaces without following proper entry procedures. Remove contaminated clothing immediately. Wash with soap and water after working with this product.

## Conditions for safe storage, including any incompatibles:

Keep away from flame, sparks, excessive temperatures and open flames. Keep away from strong oxidizers, ignition sources and heat.

Storage temperature: Store at 15°C to 30°C upon receipt.

## SECTION 8: Exposure controls/personal protection

### Control Parameters
